

Environmental Policy

I am committed to continuous improvement with regard to my Environmental Policy and reducing the carbon footprint of my business.

Energy and water

- In 2006 all new lighting installed was of the low wattage energy saving variety. All future replacement lighting will be energy efficient.
- In 2007 old computer monitors were replaced with up to date eco-energy rated monitors. In future all electronic equipment will be replaced with energy efficient models where available.
- Rechargeable batteries are to be used whenever possible and where not possible conventional batteries are to be recycled at the end of their lifecycle.

Transport

- In June 2007 a low emission diesel vehicle was purchased for company use. This vehicle will be run on bio-diesel (where locally available) in accordance with the manufacturers guidelines.
- In 2005 a satellite navigation unit was purchased to minimise travel distances. This was updated 2007.
- Where possible all meetings will be conducted by phone or internet telephone/video (e.g. skype).
- Where possible all correspondence are carried out via email e.g. invoices and statements are sent electronically.

Recycling / Waste

- All cardboard, wood, paper, aluminum, glass and plastics used in the business and for personal use are to be recycled using conventional recycling methods.

Walking the walk

- Through the WWF adopt an animal program my business has adopted a Bengal Tiger in Suklaphanta Wildlife Reserve, South-West Nepal.
